THE GLOCK AT ST. PAUL'S, LONDON. A writer in the Foreign Quarterly, thus describes the machinery of this great London clock: "The pendulum is fourteen feet long,

and the weight at the end of it is one hundred weight; the dial on the outside is regulated by a similar one within the length of the minute hand on the exterior St. Louis ...... New York ... Havre ..... Sep. 23 half inches. In the face of the dial is an aperture of about a foot square, through which visiters are allowed to protrude their heads to observe the hands in motion, the minute hand making a considerable leap at each swing of the pendulum. A gentleman was at one time indulging his curiosity in this way, the hand being above his head, and afterwards turning to look below, remained in that position, until on attempting to move he found the minute hand close upon the back of his neck, and was totally unable to extricate himself.

In a short time he would have been inevitably suffocated, even if decapitation had not ensued. Forcunately a friend was with him, who hastily summoned assistance, and the clock was just stopped in time to save his life. Since that time, the guide takes care to caution visitors prolonging their observations at a certain period in every hour. The fine-toned bell which strikes, is clearly distinguished from every other bell in the metropolis, and has been audible at the distunce of twenty miles. It is about ten feet in diameter, and it is said to weigh four and a half tons. The bell is tolled on the death of any member of the royal family, of the Lord Mayor, Bishop of London, or the Dean of the Cathedral. The whole expense for building the Cathedral was about a million and a half pounds sterling."

Excessively LITERARY .- How a young lady endeavored to adapt her style of conversation to the character of her guests, is narrated in an Ohio paper, as lollows:

Tom Corwin and Tom Ewing being en a political tour throughout the State, s opped at the house of a prominent politician at night, but found no one at home but a young niece, who presided at the supper table. She had never seen great men, and supposed they were elephan. tine altogether, and all talked in great lauguage. "Mr. Ewing, will you take condiments in you tea?" inquired the young lady. "Yes, Miss, if you please," replied the

London, England. American Establish Ann street, and 102 Nossau street, New York, Uni-The Hisdromagen is a valuable discover for protecting the feet from damp or cold, and therefore a preventive of many Lung Diseases, without any dectoring whatever. The Hydromagen is in the form of a sole, and worn inside the boot or shoe. Its medicated character is a powerful antidote to dis-

and healthy, to west in the coldest or rainiest of weather, as the food cannot becom wet if the Hydromagen is inserted. Ladies may wear too ightest soled boots or shoes in the worst weather with impunity; while Consumption, so prevalent among the young of our country, may be thwarted by their general adoption. They entirely supercede overhoes so the latter cause the feet to perspire in a very unhealthy manner, and, besides, are not dangerous wear to pedestrians in icy weather like in dia rubbers while the latter cause the feet to appear extremely large, the Hydromagen, being mere thin slice of cork prepared, resultarly placed inside, does not increase the size of the boot, or cause the foot to appear untidy. To Children they are extremely valuable, as they may engage in exercise with comfort and healthy effects. Their expense is

so slight as to scarce need mention; besides, those whe patronize them will find their yearly doctor's bills much diminished thereby. As the Hydromagen is becoming more known, its sale is increasing to an almost incredible extent.—Last year in London, Manchester, Birmingham, Live-pool, Glasgow, Leeds, Dublin, Paris, Antwerp, Hamburgh, and Berlin, our sales reached 1.732.450 pairs of Cork Soles. This year the number will far Ask the Faculty their opinion of their value as a preventive for Coughs, Colds, Bronchitis, Asthma and CONSUMPTION.

RLIXIF OR CORDIAL.—At first the properties attributed to Pro. MORSE'S INVIGOUATING ELIXIR OR CORDIAL were deemed fabulous. The public often deceived, sould not believe the simple and sublime truths aunounced by the discoverer Hat facts, undeniable facts attested by witrosses the highest class and character, are now triumphing over all doubts. INCREDULTY IS OVER-HROWN by a mass of tectimony which is perfectly

themselves beyond the reach of medicine. Let not even these despair. The Elixir deals with disease as it exists, without reference to causes, and will not

riage, emaciation, and all complaints and all barrenness a free indulgence of the passions, and all barrenness that does not proceed from of aric causes beyond the reach of medicine.

MORSE'S INVIGORATING ELIXER will replace weakness with strength, incapacity with efficiency, irregularity with uniform and natural activity, and this not only without hazard of reaction, but with a happy effect on the general organization.

Bear in mind that all maladies, wherever they legin, finish with the nervous system, and that the paralisation of the nerves or motion and ensation is physical death. Bear in mind also, that for every kind of nervous disease the Elizer Cordial is the only reliable preparation known.

Dr. Monar's Invisonarine Connai has been cousterfeited by some unprincipled persons.

In future, all the genuine Cordial will have the proprietor's fac simile pasted over the cork of each bottle, and the following words blown in the glar Dr. Morse's Invigorating Cordial,
